

## **PERMIT REQUIRED CONFINED SPACE ENTRY**

**To fulfill requirements of 29 CFR 1910.146**

The Confined Space Entry training course presented by Compliance Solutions, will allow the entrant, attendant, or supervisor to safely and confidently understand and evaluate the hazards and procedures associated with confined spaces. This training will help you to differentiate between a Permit-Required confined space and a Non-Permit-Required confined space. The course will address the hazards associated with confined spaces and it will outline the duties and responsibilities of all members of a confined space entry team, emergency rescue procedures, and plan development. The course contains several tabletop and hands on exercises to reinforce safety procedures presented in the classwork. The course meets the requirements of 29 CFR 1910.146.

### **Course Outline**

#### **Opening**

1. Who is Compliance Solutions?
2. Review of Confined Space Incidents

#### **Review of OSHA's Final Rule on Confined Spaces**

1. Review of 29 CFR 1910.146
