

EMERGENCY RESPONSE TECHNICIAN-LEVEL III 8 HOUR REFRESHER

Overview

According to OSHA regulations, each level of emergency responder must take an 8 hour annual refresher course to stay current on the techniques used in a hazardous materials incident. The 8-hour online refresher course helps to meet the requirements of OSHA in an informative and interactive manner. Included in the course are numerous techniques used in keeping the responder safe while containing and mitigating a hazardous materials spill.

*In order to fully comply with OSHA standards, students must review their company Emergency Response Plan as a part of their annual refresher training. Before the student will be allowed access to the final exam, they must attest to having reviewed a current copy of their ERP.

Who should take this course?

24 hour Level III Emergency Response Technicians
