

PC Minimum System Requirements (Mac not supported):

- Operating System: Windows 7, 8, or 10
 - Computer Memory: 4GB or more
 - Browser: Internet Explorer 9 or higher
 - Plugins: Adobe Flash and Java
 - Speakers or headphones with enabled audio
-

Configuring Internet Explorer (required for tracking student time/progress):

1. Open Internet Options
 - a. Select the *‘Privacy’* tab, change to *‘Accept all cookies’* and uncheck the *Pop-up Blocker*.
 - b. Select the *‘Security’* tab and uncheck *‘Enable Protected Mode’*. Note: Your internet security software will continue to protect your computer. Also, select the *‘Custom Level’* button, scroll down to *‘Use Pop-up Blocker’* and change to *‘disable’* then click OK to close the Security Settings dialog box.
 - c. Click *‘Apply’* in the bottom right of Internet Options dialog box and follow the prompts.
2. Select the *‘Tools’* menu. Find *‘Active X’* filtering and ensure a checkmark is not present
3. Select *Tools > Manage Addons* and ensure you have the current Adobe Systems Incorporated *Flash plugin* installed and enabled. Also in Manage Addons, ensure you have the current Oracle America, Inc *Java plugin* installed and enabled.
